PROPERTY MANAGEMENT

A structured approach to the ongoing care and oversight of property.

Quastilo provides Property Management services designed to ensure that each property is maintained, organised and supported over time.

Our approach focuses on consistency, coordination and clarity, ensuring that all property-related matters are handled in a controlled and efficient manner.

QUASTILO — MORE than expected.

APPROACH

Each property is treated individually, with attention given to its condition, functionality and overall positioning.

The objective is to maintain the property's standard over time, while ensuring that all necessary matters are addressed in a structured way.

SCOPE

Oversight

Supervision of the property and its general condition.
Periodic checks and reporting where required.

Coordination

Arrangement and coordination of maintenance, repairs and third-party services.
Communication with service providers.

Administration

Support with utility-related arrangements and general property administration.
Organisation of documentation where required.

Support

Ongoing communication with owners.
Assistance with property-related matters as they arise.

STRUCTURE

Property Management services are carried out through a structured model.

Where required, any regulated activities are handled in collaboration with licensed professionals, in accordance with applicable Cyprus regulations.

The Q Effect is the result of clarity, structure and precise positioning.

It is the difference between simply presenting a property and placing it correctly within the market.
